

# PLASTIC OVERLOAD!!!

BY 2050 THERE WILL BE MORE PLASTIC IN OUR OCEANS THAN  
FISH!

Already, the ocean is filled with about 165 million tons of plastic.

According to the World Economic Forum [http://www3.weforum.org/docs/WEF\\_The\\_New\\_Plastics\\_Economy.pdf](http://www3.weforum.org/docs/WEF_The_New_Plastics_Economy.pdf)

Beginning January 1<sup>st</sup>, 2020, start putting all your plastics in with regular trash (solid waste) to be incinerated and turned into electricity.

As the amount of plastics pile up, there are fewer places to take them. Recycling plastic has become more costly, and the outcomes are uncertain as to where our plastics really end up.

As we search for new alternatives, we're hoping all of you will find ways to reduce your plastic consumption.
